

5. *Article 5:***ASSESSMENT OF THE HEALTH PRACTICES AND THE IMPLICATION ON A BEAUTY CARE INDUSTRY.**

SUEF FUN LOW, PhD Candidate, PhD in Healthscien (Aesthetic Care), HORIZON UNIVERSITY, France.

Abstract

This research deals with the assessment of health practices and their importance in the beauty care industry in Malaysia. Beauty care industry includes various products such as fragrances, makeup, skin care, personal care, bathing and toilet products, products related to nail care and shaving care. These products are regularly used by the general people of the country therefore the players within this particular industry need to maintain the quality of their products so that the health of people cannot be affected badly. The mentioned industry is using various chemicals and petroleum in order to manufacture different types of cosmetics and skin care along with personal care products. The discussions have been made on the basis of background information related to the present study, stating the problems that are associated with the given topic along with research questions, research objectives, significance and scope of the research accompanied with delimitation of the research. The industry should be focusing on the use of chemicals in Beauty care products so that it cannot be able to cause any harm to the health condition of the general people of Malaysia.
